

Compounds for power cables.

Compounds for Low-, Medium- and High-Voltage Cables

Semi-conductive conductor shield compound

EPDM insulation compound

Semi-conductive insulation shield compound

Ultra-clean polymer compounding means increased service life for you. Indianapolis Compounds, a state-of-the-art ISO 9001:2000 certified compounding facility, is dedicated to the production of compounds at quality levels that set the standard for the industry. Specializing in advanced polymer research, Indianapolis Compounds has an established reputation for manufacturing innovative compounds that set the standard for purity, dispersion and performance. An unrelenting commitment to innovation makes us a leader in the development of commercialized, high-performance, ultra-clean filled EPDM insulation and semi-conductive shield compounds for low-, medium- and high-voltage cables.

Indianapolis Compounds—building the future of cable.
